## Education

Bachelor of Computer Applications  
(Saurashtra University - Rajkot)

## Experience

### 7Seasol - Surat

May 2021 - September 2023

### Lanatus Systems - Ahmedabad

November 2023 - January 2024

## Personal Details

**Date Of Birth :** 13th May 2000

**Nationality :** Indian

**Marital Status :** Single

**Languages :**

Gujrati, Hindi, English

## Summary

- A dedicated and skilled Frontend Developer with 3 years of hands on experience in web development
- Adept at crafting clean, maintainable, and reusable code, and well-versed in design patterns and best practices
- Exceptional at engaging with clients, gathering requirements, and conducting feasibility assessments.
- Committed to achieving tangible outcomes, skilled in programming, adept at project management, and experienced in meeting deadlines effectively.

## Projects

### 1. Focus FS - Angular

Focus FS is an innovative project tailored for the efficient management of civil engineering firms' site operations and workforce. It is a cloud-based software that significantly enhances safety and operational performance on industrial worksites. Focus FS is utilized to improve overall efficiency, foster positive behaviors, and surpass compliance standards.

Technologies Used: Angular, MySQL, IndexedDB (Chrome's fetcher), JavaScript

### 2. Coyna - Angular

I designed and developed Coyna, a comprehensive money management software using Angular. The application includes advanced features for fund management, working capital analysis, and tracking liabilities and profitability. It visually represents financial data through dynamic charts, illustrating the differences between old and new revenue streams, as well as as month-wise charts for receivables and payables.

Technologies Used: Angular, Apex charts, Material ui

### 3. MedInsight Pro - Angular

I created MedInsight Pro a survey software for the medical industry, utilizing WHO APIs to gather crucial pandemic data. The application employs dynamic chart visualization and incorporates user-friendly filters for enhanced data interpretation. Its real-time chart updates seamlessly reflect changes as users modify filters, providing a comprehensive tool for understanding and analyzing medical trends during pandemics.

Technology: Angular, AG Charts

### **3. TruBlu-direct – React, Node Js**

TruBlu Direct is an industry-leading platform offering benefits and partnerships with dentistry's leading providers. We developed TruBlu Direct to manage business reports and dentistry records, incorporating a payment gateway for dentists to purchase membership plans and efficiently manage their practices.

Technology: ReactJS, NodeJS (with Prisma and Apollo), GraphQL API, PostgreSQL.

### **4. TruBlu-Plan for health (Dental Panel) – React, Node Js**

Plan for Health is a comprehensive platform designed to empower dentists in distinguishing their practices, preserving private practice dentistry, and fostering a philosophy of optimum dental care within extraordinary teams and practice cultures.

On this platform, dentists can create membership plans tailored to their patients' needs. A payment gateway is integrated for users to conveniently make payments for these membership plans, which include various benefits akin to insurance.

Technology: ReactJS, NodeJS (with Prisma and Apollo), GraphQL API, PostgreSQL.

### **5. Group Shop – Next Js, Nest Js**

GroupShop is an E-commerce site similar to Flipkart, exclusively available in European countries. In GroupShop, we've implemented innovative features like daily drops and weekly drops. Daily drops involve the daily update of products, while weekly drops feature products updated on a weekly basis. We've incorporated functionalities such as marking products as favorites, adding them to the cart, and more. Product management is facilitated through integration with Shopify stores, where the backend fetches products from Shopify and sends them to the UI.

Technology: Next.js, Node.js (Nest.js), GraphQL API, MongoDB, Shopify.
